## Summary

---

Passionate **Frontend Web Developer** with **2.5 years of experience** specializing in crafting dynamic and user-friendly web applications using advanced technologies. **Proficient in React**, I am dedicated to delivering high-quality solutions that enhance user experience and functionality. I thrive on staying updated with the latest trends in web development to bring innovative ideas to life.

Over 1.5 years of experience collaborating with **Jio Games** and **Jio Ads**, currently contributing to Jio Ads as a valued resource. Proud to be associated with Jio, a leading tech giant in India, driving innovative solutions in the digital space.

## Technologies

---

**Languages:** JavaScript, HTML, CSS

**Frontend Technologies:** React, Next.js, Bootstrap, Ant Design, Redux, React-Query

**Software:** VS Code, Git

## Education

---

**C.U.Shah University**, B.Tech in Computer Science

Sept 2018 – May 2022

- **CGPA:** 7.25
- **Coursework:** Computer Architecture, Artificial Intelligence, Comparison of Learning Algorithms, Computational Theory, Different Coding Languages

## Experience

---

**Jr. Web Developer**, Yudiz Solutions Ltd.

July 2022 – Present

- Developed and maintained responsive and dynamic web applications using React, with a focus on performance optimization and scalability.
- Leveraged Ant Design and React-Bootstrap for consistent, reusable, and responsive UI components, incorporating advanced CSS techniques such as Flexbox and Grid for layout precision.
- Implemented client-side routing with React-Router-Dom, managed global state using Redux, and optimized data fetching and caching with React-Query.
- Maintained and refactored legacy codebases, transitioning class components to functional components with hooks to improve readability and performance.
- Integrated multiple payment gateways, ensuring secure transactions and handling edge cases for various payment scenarios.
- Managed asynchronous operations and RESTful API interactions using Axios, ensuring efficient and error-free data communication.
- Collaborated with cross-functional teams, translating complex UI/UX designs into high-quality code and working closely with backend developers to ensure smooth API integration and data flow.

**Web Developer, Intern**, Yudiz Solutions Ltd.

Jan 2022 – June 2022

- Gained hands-on experience in advanced JavaScript technologies, focusing on React and modern CSS methodologies.
- Contributed to real-world projects, making my first code commit and participating in the software development lifecycle. Collaborated with senior developers, receiving mentorship and guidance on industry best practices and coding standards.
- Assisted in the development of user interfaces, learning to translate design mockups into functional and responsive web components.

## Projects

---

### Jio Ads

July 2023 - Present

- Jio Ads is an admin panel designed for clients to manage and run ad campaigns across various Jio platforms, including Jio Cinema, Jio TV, and Jio Mart. The portal allows clients to create, manage, and monitor their advertising efforts within the Jio ecosystem.
- **Class and Functional Components:** Worked on a legacy codebase where existing features were implemented using React Class Components, while new tasks required building with React Functional Components. Gained a deep understanding of both component types and their integration.
- **File Handling Expertise:** Developed proficiency in managing file uploads and handling image and video files, crucial for creating and sequencing ad campaigns.
- **Advanced UI Development:** Utilized Ant Design extensively to create intuitive and responsive user interfaces, benefiting from the library's comprehensive UI components.
- **Ad Campaign Management:** Contributed to the functionality that supports the creation, tracking, and optimization of ad campaigns, ensuring a smooth user experience for clients.
- **Cross-Platform Integration:** Ensured that the ad campaigns ran seamlessly across various Jio platforms, providing a unified experience for users.
- **Tools Used:** Javascript, React, Redux, Ant Design, React Class Components

### Fansportiz

July 2022 - June 2023

- Fansportiz is a fantasy sports platform, similar to the Dream11 app, developed as a product of Yudz Solutions. The project involved creating web applications for four clients across India, Portugal, and Brazil, with a focus on integrating complex functionalities and ensuring seamless user experiences.
- **Client Collaboration:** Successfully managed client communications, working simultaneously with multiple clients, including Jio, one of India's largest tech giants.
- **Jio TV Integration:** Developed the web version of Fansportiz for integration with the Jio TV app, utilizing post messages for communication between the web app and the Jio TV app.
- **Design and Routing Challenges:** Overcame various design and routing challenges, gaining deep insights into efficient frontend architecture and user flow management.
- **Payment Gateway Integration:** Implemented diverse payment gateways tailored for users in India, Brazil, and Portugal, ensuring secure and smooth transactions across regions.
- **Internationalization:** Integrated internationalization features to support multiple languages and regional settings, enhancing the app's accessibility.
- **Git Management:** Managed a single Git repository for all clients, learning advanced Git techniques, including branch management, cherry-picking, and handling multiple client branches effectively.
- **Tools Used:** Javascript, React, Redux, React-Query, React-Bootstrap

## Extracurricular Activities

---

### The Coding Edge – YouTube Channel

May 2020 - Sep 2020

- Created and managed a YouTube channel focused on programming tutorials, specifically targeting the Dart language.
- Produced and published 17 instructional videos, exploring Dart and its use in Flutter, aligning with the technology's growth and popularity.
- Gained experience in content creation, video editing, and online teaching, contributing to the learning community.
